

Credit Card

Socket Error

The Socket Error is related to the Credit Card system and is caused because of the following:

1. Network or Internet is down

- **Solution:** Troubleshoot connectivity issues
-

2. Third-party software "NETePay" service not running.

- **Solution:** Restart the NETePay/DataCap software. This is accomplished by rebooting the computer.
-

3. Processor Server Non-responsive

The DNS Server (Credit Card Server (Processor)) is down or non-responsive. This is a very common error.

- **Solution:** Inquire Heartland Payment Systems
