WizChip: Sell, Up-Sell & Void

What is a WizChip? WizChips are traceable paper chips resembling the old bar Drink Coins. WizChips allow a customer to pay for a product as a gift or other means in which the customer can redeem at a later date.

The date or moment of a WizChip Purchase is only a piece of paper. The physical product is subtracted from inventory at time of the WizChip redemption.

Selling a WizChip

1. From the *Food & Beverage Sales Screen*, select any menu item(s) the customer wishes to consume at a later time.
2. Select **>WizChip >Accept**
3. Collect funds needed and hand the printed WizChip to the customer.

Up-Sell for another Item

Note: Always remember that WizChips remain active in the system once sold and must be deactivated, even if the chip was a mistake and needs to be voided.

If a product of higher or equal value is requested on an existing open WizChip, the open WizChip will first need to be voided. The credit available can be then used for another equal or higher valued product.

1. Select **>WizChipIn** located at the top left corner of the screen
2. **>Scan or >Manually** enter the WizChip code
3. Locate and >select the same product from the menu **>VOID**
4. A credit of the WizChip item will be displayed on the Sales Grid
5. Select any other item the customer wishes to purchase
6. Collect any fund(s) from the customer then **>Accept**

Void Open WizChip

- Repeat Steps 1 – 4 above **>Accept**
