Food & Beverage: How to print the Menu & Prices

The Food & Beverage menu report is located within >**Product Setup**

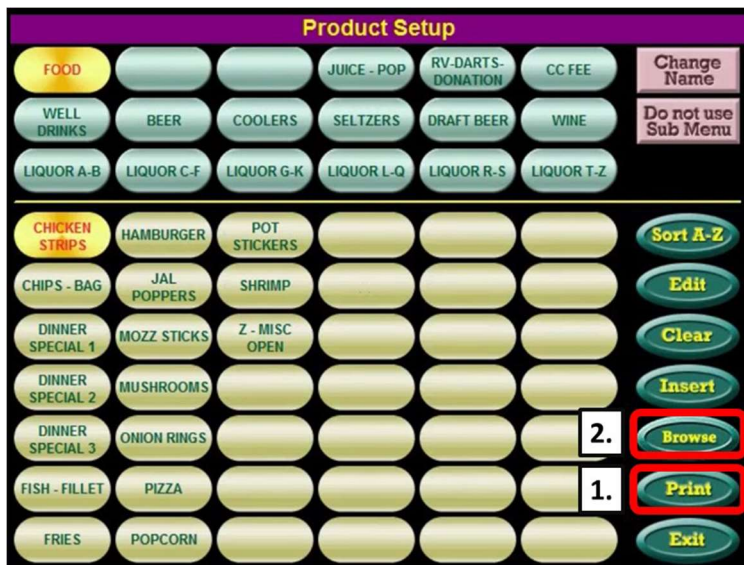

1. Select >**Settings** >**Setup** >**Product Setup**

2. Select the >**Print** button and you are finished.

Note: If it doesn't print, continue on. It may be because the report will generate about 20-50 pieces of paper. The memory may not hold that much raw data so it is best to print to a pdf file to decrease memory size.

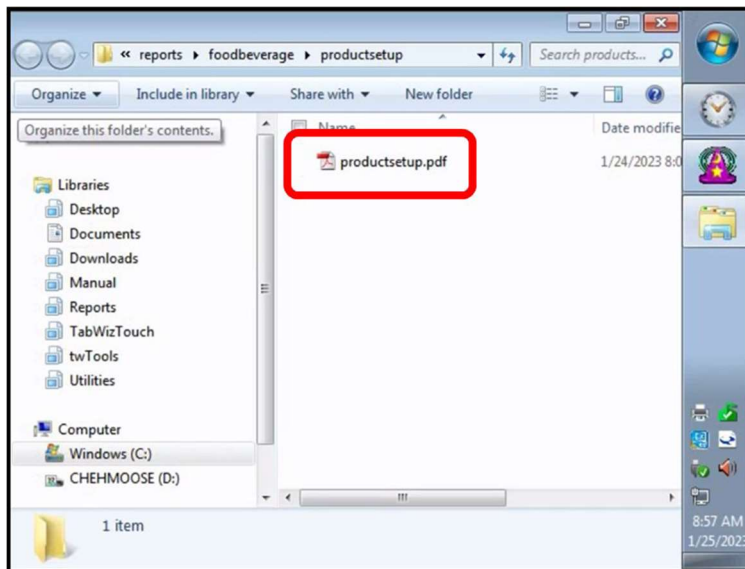

3. Select the >**Browse** button

5. Select the >**Print** button on top of the screen

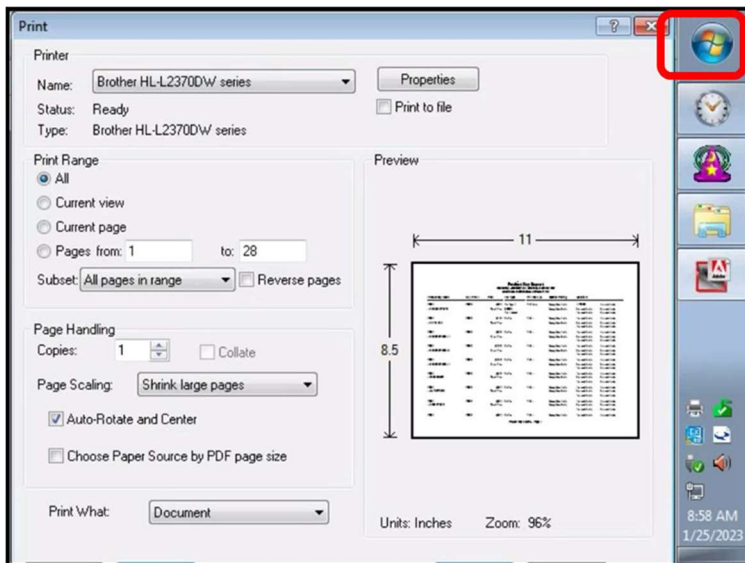

Note: You will notice when the print dialog page appears, you will not be able to see the lower buttons of which the >OK button is located. This is because of a screen resolution factor. You must change the screen resolution to 1024x768 to make this work.
